

beyza demir | elif dilan nadir | manas demirkasımođlu | zeynep naz vuran

"nuance" offers designs that support and develop social life in every respect. It is based on the continuity of communal life and aims to address all user profiles at the same time or in different places.

Transition zones which called threshold can be assigned to the individual units or common areas as required. The degree of privacy varies as a result. The purpose of the nuance is to provide levels of publicity and designing maximum flexibility for the users.

nuance's business card

what does organism offer?

- self sufficiency are overlapping states of being in which a person or organization needs little or no help from; or intersection with, outside.
- to minimize the dependency to outside in terms of economy and production.
- to create a mutualistic relationship for different profiles.
